

Dear Virginia State Corporation Commissioners,

Dominion has proposed to retire two coal plants, Chesapeake and Yorktown, in Hampton Roads because the plants are over 50 years old and cannot meet current and impending regulations to safeguard healthy air and clean water. This proposal makes good economic and environmental sense, and I urge you to approve these plans. Hard-earned ratepayer dollars should not be spent to prolong the lives of these plants, especially as alternatives exist that do not rely on a fuel that is increasingly costly to purchase and burn.

In fact, these coal plant retirements provide Dominion with a real opportunity to invest in efficiency, wind, and solar to ensure that Virginians can benefit from the clean energy economy that is driving job growth across this country. Wind and solar also provide stable energy prices because in both cases the fuel is free. It is critical that Dominion's long-range energy plans include major investments in efficiency, wind and solar, especially offshore wind. As a Dominion ratepayer I urge the SCC to support these investments in Virginia's clean energy future.

Sincerely:
